

Engineering Letters

Contents: Volume 33, Issue 11: November 2025

Online Version Available: 1 November 2025

JOURNAL PAPERS:

Design and Strength Analysis of Reduction Clutch for a Cable Tail Coiling Device

Kai Bai, Zheng Zhang, Zhanlong Li, Beijun Guo, Zhipeng Li, and Zhiqi Liu, Engineering Letters, 33:11, pages 4306-4312.

Soil-structure Interaction Effects on Tall Industrial Chimney Subjected to Along-wind Load

Sandeep G S, Arun Kumar Y M, Poornachandra Pandit, and Jayalekshmi B R, Engineering Letters, 33:11, pages 4313-4325.

ADA-YOLO:Real-Time Object Detection Model for UAVs Infrared Based on YOLOv11

Xiaolin Gu, and Ao Shen, Engineering Letters, 33:11, pages 4326-4340.

Spark Task Scheduling Strategy Based on Multidimensional Load Sensing

Congyang Wang, Qingsong Xu, Haifeng Fei, Han Li, Yanhao Zhang, and Junyang Yu, Engineering Letters, 33:11, pages 4341-4352.

Comparative Analysis of Elliptical and Cylindrical Slot Tubes in Cross-Flow Radiators: Thermal Resistance and Flow Characteristics

Anand Pai, Satish Shenoy B., and Chandrakant R Kini, *Engineering Letters*, 33:11, pages 4353-4361.

Application of Optimized GUI Component Identification Method in User Interface Graphic Design

Jie Song, and Na Li, *Engineering Letters*, 33:11, pages 4362-4374.

Electromagnetic Characteristics Analysis and Optimization for Magnetic-Axis-Offset Hybrid-Pole Interior Permanent Magnet Motor

Haoyang Xu, Liwei Shi, Ziheng Pan, Ruohong, and Shifeng Shi, *Engineering Letters*, 33:11, pages 4375-4384.

Dynamical Analysis and Forward Euler Discretisation of an SEIR-Type Epidemic Model Incorporating Vaccination

Fiorentina Abigail, Jonathan Hoseana, and Benny Yong, *Engineering Letters*, 33:11, pages 4385-4393.

Research on the Optimization of the Operation Plan for Suburban Railway and Urban Rail Trains under Cross-line Operation

Saibo Wang, Changfeng Zhu, Yunqi Fu, Jie Wang, Linna Cheng, and Rongjie Kuang, *Engineering Letters*, 33:11, pages 4394-4404.

DMCFRec: A Dual-path Multi-modal Collaborative Filtering Model with Implicit Feedback

Lixue Wang, and Ye Tao, *Engineering Letters*, 33:11, pages 4405-4414.

A Comprehensive Analysis of Clique Vertex Neighborhood Numbers

Swarna J B, K Arathi Bhat, and Smitha Ganesh Bhat, *Engineering Letters*, 33:11, pages 4415-4421.

Synergistic Study on Aerodynamic Performance Optimization and Flutter Suppression of a Compressor Impeller Based on Response Surface Method

Zhiqiang Dong, and Genliang Yu, *Engineering Letters*, 33:11, pages 4422-4436.

Tomato Leaf Spot Segmentation and Disease Degree Classification Based on the Improved UNet Model

Xueke Xu, Liuai Wu, Zhongrong Zhang, and Yulin Shen, *Engineering Letters*, 33:11, pages 4437-4447.

YOLO-GARNet: A High-Quality Deep Learning System for Garment Analysis and Personalized Fashion Recommendation

Ilham Kachbal, Imrane Errafi, Mousaab EL Harmali, Said El Abdellaoui, and Khadija Arhid, *Engineering Letters*, 33:11, pages 4448-4462.

Tuna Swarm Optimization Algorithm with Sine Selection Factor to Solve High-dimensional Feature Selection Problems

Yu-Cai Wang, Shi Li, Jie-Sheng Wang, Zi-Rui Xu, and Si-Yu Jin, *Engineering Letters*, 33:11, pages 4463-4477.

Research on Small Target Detection of Traffic Signs Based on Improved YOLOv11n Model

Qiqi Wan, and Weisheng Liu, *Engineering Letters*, 33:11, pages 4478-4491.

TCORRA: Termite Colony Optimization based Route Repair Algorithm for Auto-configuration of Broken Links in Mobile Ad hoc Networks

Ramanpreet Kaur, Kavita Taneja, and Harmunish Taneja, *Engineering Letters*, 33:11, pages 4492-4506.

Hamilton Connectivity Analysis of Data Center Network Based on Meta-structure Network

Hui Li, Linyu Yang, and Xiaoyu Du, *Engineering Letters*, 33:11, pages 4507-4517.

Improved SCSO Algorithm Incorporating Disorienting Behavior and Dynamic Adaptive Adjustment Strategy into UAV Path Planning Optimization

Yong-Chen Li, and Qiang Qu, *Engineering Letters*, 33:11, pages 4518-4532.

CA-Res3D: A Residual Framework with Channel Attention for 3D Object Detection

D. Jyothsna, and G. Ramesh Chandra, *Engineering Letters*, 33:11, pages 4533-4544.

FMA-WGAN: A Frequency-Aware Multi-Scale Adversarial Network for Retinal Vessel Segmentation

Xiaoyu Wang, Qichen Wang, Yiying Wang, and Qing Ai, *Engineering Letters*, 33:11, pages 4545-4557.

YOLO-MAFS: Multi-scale Attention Fusion Network for Precise Breast Cancer Segmentation in Ultrasound Images

Luming Chen, and Xinhe Zhang, *Engineering Letters*, 33:11, pages 4558-4567.

Innovative Approaches to Improve the Mechanical and Durability Properties of Recycled Aggregate Concrete

Bassam S. A. Dabbour, MZA Mohd Zahid, B.H. Abu Bakar, Abraham A Ali Blash, Rahman N.A., and Herni Halim, *Engineering Letters*, 33:11, pages 4568-4583.

Improved YOLOv5-Based Electric Bicycle Detection Algorithm in Elevators Using State Space Models

Lingzhi Wang, and Yingfan Wu, *Engineering Letters*, 33:11, pages 4584-4592.

A Two-Stage Information-Driven Multi-View Multi-Label Learning Method for Incomplete Data with Noisy Labels

Minghao Zhou, Yiying Wang, Siying Pan, Yuanyuan Li, and Qing Ai, *Engineering Letters*, 33:11, pages 4593-4604.

Application of Graph Complements and Labeling in Secure Communication

Naik Sinchana Ganapathi, Medini H.R., and Sabitha D'Souza, *Engineering Letters*, 33:11, pages 4605-4611.

Comprehensive Evaluation of Electric Vehicle Charging Responsiveness Based on Combined Weights and Grey-TOPSIS

Yiwei Ma, Ningying Liu, and Miao Huang, *Engineering Letters*, 33:11, pages 4612-4624.

MatVMD-TGCN: A Fusion Model for Traffic Speed Prediction

Duoliang Liu, Meijuan Li, and Xuebo Chen, *Engineering Letters*, 33:11, pages 4625-4640.

The Effect of Gravity and Surface Tension on Free Surface Flows Over a Submerged Obstacles

Abdelkader Laiadi, *Engineering Letters*, 33:11, pages 4641-4645.

Disentangled and Diffusion-Denoising Enhanced GNN for Social Recommendation

Xinlong Yang, Dan Yang, and Yang Liu, *Engineering Letters*, 33:11, pages 4646-4655.

Lithium Battery Capacity Prediction Model Based on LSTM Optimized by Two-dimensional Circle Chaotic Map and Random Adjustment Factor Arithmetic Optimization Algorithm

Shi Li, and Bing Liu, *Engineering Letters*, 33:11, pages 4656-4669.

TCG-CS: A Novel Cold-Start Recommendation Approach using Transformer-Capsule Networks and Gaussian Mixture Model Clustering

Vinay Kumar Matam, and N Madhusudhana Reddy, *Engineering Letters*, 33:11, pages 4670-4687.

DIMAN: A Dynamic Iterative Multi-scale Attention Network for Retinal Artery/Vein Segmentation

Yuanyuan Li, Jiansheng Wu, and Yang Liu, Engineering Letters, 33:11, pages 4688-4697.

Minimisation of Medicine Inventory Costs Based on a Discretised SIS-Type Epidemic Model Involving Immigrants

Fransiska Eveline, Jonathan Hoseana, and Dharma Lesmono, Engineering Letters, 33:11, pages 4698-4708.

DR-DDA: Double Residual Graph Transformer for Drug-disease Association Prediction

Ronghe Zhou, and Yong Zhang, Engineering Letters, 33:11, pages 4709-4717.

ArrhythTransform: Multi-Head Attention-Based Transformer Encoder for Arrhythmia Classification

Rahula Shylaja, and L. V. Rajani Kumari, Engineering Letters, 33:11, pages 4718-4730.

Research on Named Entity Recognition Algorithm for Chinese Electronic Medical Records Based on Knowledge Embedding

Haotian Yang, and Yanpeng Yang, Engineering Letters, 33:11, pages 4731-4736.
