Engineering Letters

Contents: Volume 33, Issue 7: July 2025

Online Version Available: 1 July 2025

JOURNAL PAPERS:

Research on the Mechanism of Technological Innovation Investment and Innovation Performance

Zhuo Luo, Tiantian Peng, and Jun Li, Engineering Letters, 33:7, pages 2243-2260.

GARCH-LSTM for Stock Price Prediction Using Sentiment Analysis

Guanghui Chen, and Li Wang, Engineering Letters, 33:7, pages 2261-2271.

Design and Comparative Analysis of Vertical and Planar Tunnel Field Effect Transistors for Analog Performance Parameters

V. Saraswathi, and N. Siddaiah, Engineering Letters, 33:7, pages 2272-2283.

Research on Bat Optimization Algorithms Incorporating Multiple Strategies

Zhijun Teng, Yaoyao Cui, Liangcen Gu, Yushan Fu, Yizhou Chen, and Hongbiao Li, Engineering Letters, 33:7, pages 2284-2292.

Propagation Properties of Pearcey-Gaussian Beam and Interaction of Symmetric Pearcey-Gaussian Beams in Photorefractive Media

Siyuan Pan, and Guoxing Huang, Engineering Letters, 33:7, pages 2293-2300.

Electric Field-driven Jet Printing of Flexible Transparent Conductive Films

Fulai Cao, Yanpu Chao, Jiaping Chen, Xianhao Ma, Xiaobo Zhao, and Yizhuo Shi, Engineering Letters, 33:7, pages 2301-2308.

Cancer Gene Expression Data Feature Selection with ReliefF Guided Binary Pelican Optimization Algorithm

Hao-Ming Song, Jie-Sheng Wang, Yu-Cai Wang, Yu-Wei Song, and Yu-Liang Qi, Engineering Letters, 33:7, pages 2309-2326.

Evolutionary Game Analysis and Optimization of Police-Enterprise Cooperative Mechanism in Telecommunication Network Fraud Governance

Yongzhao Wang, Lijun Zhou, Yue Liu, and Bingqing Xie, Engineering Letters, 33:7, pages 2327-2335.

A Simulation of Shoreline Evolution with a Groin Structure Using an Alternative Machine Learning Algorithm

Surasak Manilam, and Nopparat Pochai, Engineering Letters, 33:7, pages 2336-2344.

Dynamic Constitutive Model and Impact Resistance of Q460 Steel

Xiuhua Zhang, and Shuang Yuan, Engineering Letters, 33:7, pages 2345-2354.

Research on Drowning Identification Based on Improved YOLOv8

Litao Cai, Youbing Feng, Xueyun Wei, and Feng Xiong, Engineering Letters, 33:7, pages 2355-2367.

Close-Range Mainlobe Interference Suppression in FDA Radar

Yisheng Yan, Jie Cheng, Xingyi Meng, Wen-Qin Wang, and Chaogang Li, Engineering Letters, 33:7, pages 2368-2372.

Pricing Compound Ratchet-Type Equity-Indexed Annuities in the Indonesian Market: Comparing Constant and Stochastic Interest Rates

Jovan Brian Tanujaya, Ferry Jaya Permana, and Jonathan Hoseana, Engineering Letters, 33:7, pages 2373-2380.

Detection of False Data Injection Attacks in Microgrids Based on IGWO-CKF Algorithm

Wei Luo, Minglei Xie, Jinfeng Wang, Yuanzhe Zhu, Wanlin Du, Weizhong Chen, and Qinlong Hu, Engineering Letters, 33:7, pages 2381-2395.

Effect of the Parameters of a Damping Ditch on the Reduction of the Engineering Vibration

ZHANG Haixing, HOU Xingmin, and QU Qianqian, Engineering Letters, 33:7, pages 2396-2404.

Government Subsidy Strategies about The Food Post-harvest Loss Reduction Technology: Considering Quality Loss and Quantity Loss

Nan Su, Pan Liu, Jiamin Zhu, JianHua Wang, and Bin Zhao, Engineering Letters, 33:7, pages 2405-2418.

Topology Optimization and Additive Manufacturing for Electrohydraulic Actuators in Hydraulic Foot Robots

Chikun Gong, Longkun Li, Lipeng Yuan, and Yuhang Yang, Engineering Letters, 33:7, pages 2419-2427.

An Efficient Classification Technique of Acute Lymphoblastic Leukemia Cells

Hadeel Farag, Noura A.Semary, Khalid M.Amin, and Sondos Fadl, Engineering Letters, 33:7, pages 2428-2443.

Swimming Velocity of Spherical Magnetic Microrobots under Gradient Magnetic Field

Shiqi Ma, and Lizhong Xu, Engineering Letters, 33:7, pages 2444-2455.

Optimization of Flexible Train Timetable with Passenger Travel Information by Demand Responsive Model

Songliang Zhang, and Dewei Li, Engineering Letters, 33:7, pages 2456-2464.

Analysis for Effective Flange Width Considering Slip Effect for Main Girder of Composite Cable stayed Bridges during Construction Phase

Hua Luo, Jianqiang Feng, Qincong She, Bin Li, Changqing Wu, Mingdeng Pan, and Yongqing Zeng, Engineering Letters, 33:7, pages 2465-2477.

A Quasi-local Approach for Link Prediction in Graphs Based on Node Affinity Tree

Mohammad Nowsin Amin Sheikh, Md Kamrul Islam, Sagar Chakraborty, I-Shyan Hwang, Wissem Inoubli, and Md Abdul Kader, Engineering Letters, 33:7, pages 2478-2489.

Numerical Solution and Stability Analysis of the Burgers Equation Based on SPH Method

Rui Zhao, and Rahmatjan Imin, Engineering Letters, 33:7, pages 2490-2500.

Optimizing Short-term Power Load Forecasting with a Hybrid PSO-SVR-LSTM Approach based on Data Analysis

Shakeel Ahmad, Jinsong Tao, and Rahat Ali, Engineering Letters, 33:7, pages 2501-2513.

Road Surface Recognition Method of Automatic Driving System Based on Improved ResNet Model

Lixia Niu, Binhe Sun, Shize Liu, and Sijia Liang, Engineering Letters, 33:7, pages 2514-2523.

Saturation Wind Effects on the Dynamics of a Modified Leslie-Gower Predator-Prey Model: Stability and Ecological Implications

Fengde Chen, Jiaxing Ye, Guangwen He, and Yuting Huang, Engineering Letters, 33:7, pages 2524-2541.

Comparative Study of Sinc Collocation Method versus Hybrid Sinc-Finite Difference Methods for Solving Burgers' Equations

Moayad Odeh, Martin Mohlenkamp, Muhammad Usman, and Todd Young, Engineering Letters, 33:7, pages 2542-2556.

Real-Time Monitoring Method for Chiller Unit's Cooling Water Inlet Flow Based on Time Series Classification

Fayang Li, Wen Yang, Aiping Pang, and Qianchuan Zhao, Engineering Letters, 33:7, pages 2557-2566.

Effect of Ambient Temperature and Intake Humidity on the Cold Start Performance of PEMFC

Hongyan Wang, Qian Hong, Binbin Sun, Pengwei Wang, and Bintao Li, Engineering Letters, 33:7, pages 2567-2573.

Dynamic Effects of Fear-Dependent Refuge and Fear Effects on Lotka-Volterra Amensalism Model

Yuting Huang, Guangwen He, and Fengde Chen, Engineering Letters, 33:7, pages 2574-2588.

Research on Lightweight Infrared Target Detection Algorithm Based on Deep Learning

Jingshi Zhang, Yujun Zhang, and Jianhan Zhou, Engineering Letters, 33:7, pages 2589-2597.

Outlier Detection and Correction in Wireless Sensor Networks Using a 2-Level Hierarchical Clustering and Gaussian Process Regression Methods

Edward Yellakuor Baagyere, Regina Esi Turkson, Gideon Evans Wenya, and Iven Aabaah, Engineering Letters, 33:7, pages 2598-2609.

Finite-Time Sliding Mode Control of Vehicle Formations Considering Performance Constraints

Dongyang Guo, Zhao Zhang, Hongyan Zhou, and Xue-Bo Chen, Engineering Letters, 33:7, pages 2610-2619.

Stability and Bifurcation in Lotka-Volterra Amensalism Model with Saturated Wind Effect

Fengde Chen, Yuting Huang, and Guangwen He, Engineering Letters, 33:7, pages 2620-2633.

Research on APT Detection Model Based on Graph Attention Network and Auto-encoder

Jiwang Sun, Hong Dai, Baiping Sun, and Xi Wei, Engineering Letters, 33:7, pages 2634-2642.

Lung Cancer Subtype Image Classification Based on Multi-Model Fusion

HaoLiang Ji, and Xiaoxia Zhang, Engineering Letters, 33:7, pages 2643-2653.

Enhanced Humidity Sensing Utilizing Tin Oxide Nanoparticles Embedded in a Seaweed Polymer Matrix

I Dewa Putu Hermida, Goib Wiranto, Desak Gede Sri Andayani, Deviana Agustina, Rizki Deva Berlian, Irzaman, Asrul Izam Azmi, and Sevia Mahdaliza Idrus Sutan Nameh, Engineering Letters, 33:7, pages 2654-2664.

Reinforcement Learning architecture Based Fixed-Time Optimal Control for Hydraulic Support Cylinder System

Yujun Zhang, Yunyun Chai, and Dongxiang Gao, Engineering Letters, 33:7, pages 2665-2672.

Lightweight Steel Surface Defect Detection Based on YOLOv10

Luyu Sun, and Yujun Zhang, Engineering Letters, 33:7, pages 2673-2685.

Optimization of High-speed Rail Train Service Plan Considering Dynamic Formation in the Context of Carbon Peak Initiative

Siyu Cao, Xuelei Meng, Xiaoqing Chen, Ruhu Gao, and Qianyu Wang, Engineering Letters, 33:7, pages 2686-2696.

Influence of Traction Transmission System on Hunting Stability of Train Bogie System

Yuewei Yu, Leilei Zhao, Yirui Zhang, Chuanbo Ma, and Boao Yan, Engineering Letters, 33:7, pages 2697-2704.

OTFS Signal Detection Method by Fusing Multi-Feature and Optimization Strategies

Xinlin Wang, and Liejuan Yin, Engineering Letters, 33:7, pages 2705-2712.

Effect of Soil-pile Interaction on Inclined Pile Group Subjected to Axial and Lateral Loads

Sandeep G S, Arun Kumar Y M, Poornachandra Pandit, and Varghese Basil Alexander, Engineering Letters, 33:7, pages 2713-2722.

BDS-YOLOv8: An Enhanced UAV-Based Algorithm for Small Object Detection

Kai Peng, and Yang Xu, Engineering Letters, 33:7, pages 2723-2732.

Mechanical Properties of Lytag Concrete Reinforced with Hybrid Fibers

Ming Zhang, Jiahua Jing, and Shike Zhang, Engineering Letters, 33:7, pages 2733-2741.

Differential Difference Gain Amplifier (DDGA) and Its Applications

Jetsdaporn Satansup, Tattaya Pukkalanun, and Worapong Tangsrirat, Engineering Letters, 33:7, pages 2742-2748.

SE-CNN-BiLSTM Lithium-ion Battery SOC Prediction Model Based on Bayesian Optimization and Wavelet Denoising

Song-Bo Zhang, Jie-Sheng Wang, Chun-Ni Shi, Xiao-Tian Wang, and Jun-Yu Lu, Engineering Letters, 33:7, pages 2749-2771.

Model Reference Adaptive Control of a Mobile Robot Using Popov Hyperstability Theory

Haitao Zhang, and Wenshao Bu, Engineering Letters, 33:7, pages 2772-2777.

Multi-Scale Residual Vision Transformer (MSRViT): A Robust Framework for Remote Sensing Image Segmentation

Guanlin Li, and Ji Zhao, Engineering Letters, 33:7, pages 2778-2788.

A Caputo Fractional Epidemiological MSIR Model

Youssef Difaa, Bouchaib Khajji, and Hicham Benaissa, Engineering Letters, 33:7, pages 2789-2796.

Lightweight Fatigue Driving Detection Based on Improved YOLOv8

Shidong Sun, and Yang Xu, Engineering Letters, 33:7, pages 2797-2805.

Adaptive Fusion Multi-View Dual Contrastive Learning for Recommendation

Kunpeng Li, Dan Yang, and Xi Gong, Engineering Letters, 33:7, pages 2806-2816.

Dynamic Analysis and Optimal Control of the SI1I2AR Investor Sentiment Propagation Model Under the Influence of Rumors

Mengjiao Ye, and Yuhan Hu, Engineering Letters, 33:7, pages 2817-2830.

Parametric Study of a Finite-Time Steady Flow Reversed Lenoir Refrigeration Cycle

Anand Pai, Chandrakantha Bekal, Manjunath Shetty, and Satish Shenoy B., Engineering Letters, 33:7, pages 2831-2840.

DC Injection Suppression in a Transformer-Less T-Type Grid-Connected Converter Using an Improved SWDIM and Fuzzy-Fractional PID Controller

Jingmei Guo, Chao Sheng, Pandian Luo, Jian Zhang, and Zhengjun Shi, Engineering Letters, 33:7, pages 2841-2849.

An Intelligent Agent-Based Multi-Scale Target Detection System for Remote Sensing Images Using YOLOv8

Jifeng Ding, Jiayuan Lin, Kechao Zhang, and Xuan Wang, Engineering Letters, 33:7, pages 2850-2863.

A Frequency-Selective Multi-Window Attention Model for EEG Motor Imagery Classification

Yixin Wang, Tianwei Shi, and Xintong Ye, Engineering Letters, 33:7, pages 2864-2872.
